

Kabir Patel . Jarvis Consulting

I am a data professional with 3+ years of experience designing and deploying scalable ETL pipelines, data models, and analytics platforms across real estate, education, and fintech domains. Skilled in data integration, warehousing, and performance optimization, with expertise in turning large, raw datasets into reliable, analytics-ready assets. Experienced in leveraging LLMs, AI agents, and NLP to build GenAI-driven solutions that automate workflows and enhance decision-making. Passionate about building robust, production-grade data infrastructure that powers actionable insights and business growth.

Skills

Proficient: Python, Snowflake, Linux/Bash, RDBMS/SQL, Agile/Scrum, Git, Sigma Computing BI, PowerBI, Azure OpenAI, LangGraph, JSON, YAML

Competent: Java, HuggingFace Transformers, LLMs, Agentic AI model, PyTorch, Tensorflow, ScikitLearn, Real Estate data APIs, NLP, Vector databases, Prompt Engineering

Familiar: Fortran, Azure, AWS, PowerQuery, Data streaming, Kafka, Hadoop

Jarvis Projects

Project source code: https://github.com/jarviscanada/jarvis_data_eng_KabirPatel

Cluster Monitor [GitHub]: Dispatched fully-automated monitoring agents hosted on multiple Linux servers that communicate real-time hardware and resource usage data to a centralized database. Supported Linux Cluster Administration team with a transformed stream of data to research upon, which resulted into a scalable and cost-efficient network system design, saving the company \$36000 annually. Tech Stack: Bash, Docker, PSQL, Git, Cron (for scheduling agents), Vim, Linux systems

Highlighted Projects

Agentic AI Model: Designed an agent to automate data reporting for stakeholders. Implemented multi-step tool use (retrieval, transformation, summarization); scheduled runs and implemented clear exception-handling/reporting to improve reliability and trust. Tech Stack: Python, S3 storage, Snowflake, Sigma BI, LangChain, GPT, JSON, Git

Real Estate Recommendation Engine: Deployed a real-time dashboard that blends market/demographic features (Census, listing feeds, exclusive market insights) to suggest target submarkets for investments. Utilized Machine Learning to recognize factors contributing towards the real estate market. Designed a forecaster algorithm using AI/ML to predict market trends. Delivered interactive visuals and evaluation notes to explain recommendations to non-technical users. Tech Stack: Python, Tensorflow, SciKitLearn, GPT, Snowflake, Cortex AI, Sigma BI, US Census API, Redfin API, Zillow API, RealPage API

Professional Experiences

Data Engineer, Jarvis Consulting (August 2025 - Present): Developed end-to-end data projects such as Linux/SQL cluster monitoring. Focused on reproducible environments, clean schemas, and actionable dashboards while practicing Agile delivery and Git-based workflows. Utilized various data skills and tools to create automated processes and achieve scalable data pipelines and resilient data integrity to reduce human input by 60%, hence, economizing labour costs and improving data processing speeds.

Centre Director, Mathnasium (May 2024 - Present): Managed daily operations, training schedules, and team workflows aligned to learning standards; coordinated KPI tracking and performance summaries (attendance/retention); ensured parent communications and budget/vendor management; prepared monthly reports to HQ; improved center efficiency through data-driven routines.

Real Estate Data and AI Consultant, Emergent Ventures (January 2023 - May 2025): Produced weekly lease/sales intelligence using Redfin/RealPage/Census APIs; built Snowflake/AWS property datasets (500+ TB) with automated Python pipelines; created Power BI/Sigma BI dashboards by class/ZIP/lease type; supported broker valuations and trend analysis; contributed GenAI research briefs with GPT + LangChain.

GenAI Accelerator Program Participant, Cognizant (January 2025 - April 2025): Trained on enterprise GenAI use cases, LLM evaluation, and prompt engineering; built agents for document summarization and trend extraction;

integrated Azure OpenAI, LangChain, and Snowflake AI to automate market research and reduce time-to-insight for stakeholders.

Data Analyst Intern, Fairfield Hotel Group (January 2022 - December 2023): Delivered financial and operational analysis across a CRE portfolio; forecasted occupancy/revenue trends; generated KPIs (cap rates, IRR, rent composition); automated monthly pipelines (90% time reduction); built investor dashboards; supported audits and reconciliations with clean documentation.

Education

York University (2020 - 2023), Bachelor of Science, Computer Science - Scholarship

Miscellaneous

- Cognizant GenAI Accelerator - Top Performer (2025)
- Snowflake Data Warehousing - Certified (2024)
